This one-day course explores fundamentals of TIBCO Cloud Mashery software and explains basic artifacts like APIs, endpoints, packages and plans, the administrative dashboard, and basic security features. It also covers the Mashery developer portal features and benefits and the use of interactive documentation to build and test the functionality of any published API.

Learning Objectives

- Introduce TIBCO Mashery software
- Explore the administrative portal and dashboard
- Explain basic security
- Work with the developer portal and API documentation

Course Prerequisites

- none

**TIBCO NOW product knowledge courses are a condensed version of the full one day fundamental courses offered in TIBCO Academy. Some of the topics discussed in the data sheet may be condensed or eliminated due to time constraints.*
