This one-day course explores fundamentals of analytics and explains how to build useful, interactive visualizations using TIBCO Spotfire visual analytics. It examines the key components of good analytics solutions and provides general guidelines for when to use specific visualization types. After covering data access and import and storage options, participants will learn how to build simple visualizations using well known chart types such as tables, bar charts, line charts, and scatter plots. Attendees configure basic visualization properties and design interactive features.

Learning Objectives

- Introduce TIBCO Spotfire software
- Explore the Spotfire Client user interface
- Explore accessing data
- Explain basic visualizations including table and bar chart, line chart, and scatter plot
- Understand marking, filtering, and exporting
- Explore basic interactive features in Spotfire software

Course Prerequisites

- none

**TIBCO NOW product knowledge courses are a condensed version of the full one day fundamental courses offered in TIBCO Academy. Some of the topics discussed in the data sheet may be condensed or eliminated due to time constraints.*
