This four-day advanced course demonstrates the process for creating various visualizations, configuring visualization properties, and designing complex interactive features. Learn to create data tables that draw from multiple data sources and methods to capture several aspects of an analysis.

Use the Spotfire Web client to share visualizations among users with different roles and access controls. Create expressions and understand the development and use of complex expressions using over and then functions. Explore the text area controls and use the scripts written in R and IronPython to expand the capabilities for the inbuilt TIBCO Enterprise Runtime for R (TERR) engine and TIBCO Spotfire Automation Services software.

Learning Objectives

- Explore visualizations
- Work with web clients
- Explore details visualizations and filtering scheme
- Explore collaboration sharing and the Spotfire Automation Services job builder
- Understand table relations, columns, and row operations
- Explain transformations and calculated columns
- Understand advanced custom expressions
- Explain information links and data connectors
- Explore TIBCO Spotfire Data Streams software
- Create and customize map charts
- Explore text areas and property controls
- Explain multivariate data analysis tools
- Explain data relationships and predictive modeling
- Implement Action Control and IronPython scripts
- Understand TERR expressions and data functions

Course Prerequisites

- TSP101: TIBCO Spotfire – Fundamentals

**TIBCO NOW product knowledge courses are a condensed version of the full one day fundamental courses offered in TIBCO Academy. Some of the topics discussed in the data sheet may be condensed or eliminated due to time constraints.*
