

TIBCO NOW 2018 TRACKS

Moving to the Cloud with TIBCO

for IT managers, application development managers, developers, architects, and product managers.

Ensure your cloud migration sets you up for transformation by providing the foundation for accelerating app development, streamlining business processes, and democratizing analytics. Learn about TIBCO solutions in the cloud, recommended practices for deploying TIBCO Cloud™ Spotfire® analytics, and how the TIBCO® Connected Intelligence Cloud platform can be used to accelerate innovation, reach operational excellence, and deliver business value.

Session Preview:

- Accelerating Business Apps Development with TIBCO Cloud
- Recommended Practices for Deploying Spotfire® in the Cloud
- Migrating Options for Moving your TIBCO BusinessWorks™ Workload to the Cloud

Products:

TIBCO Cloud™ Integration
TIBCO Cloud™ Live Apps
TIBCO Cloud™ Messaging
TIBCO Cloud™ Spotfire®
TIBCO Cloudpath
TIBCO BusinessWorks™
TIBCO ActiveMatrix® BPM
TIBCO® Messaging

Adopting Modern Application Architecture

for API product managers, app developers, and architects.

Modern application architecture includes provisions for pervasive integration that connects every element of the business. Learn about TIBCO's open source stack and roadmap for building and deploying to serverless environments, leveraging machine learning to build smart edge applications with the lightweight Project Flogo® integration engine, and building reactive applications with data pipes.

Session Preview:

- Evolve to Event-driven APIs using Microgateways and Service Mesh
- Build Smart Edge Applications Leveraging Machine Learning
- Build and Deploy a Serverless Architecture

Products:

TIBCO Cloud Integration
TIBCO Messaging
TIBCO Mashery®
Apache Kafka
Flogo®
Project Mashling™
TIBCO Jaspersoft®

Empowering Digital Business Users

for IT managers, application development managers, CIOs, citizen integrators, citizen developers, and business analysts.

Transform your workforce with easy to use technologies that enable innovation and collaboration. This track includes sessions on strategies and products for joining customer engagement and operational excellence, and for accelerating digital transformation and innovation with low-code development. Learn how you can enable the right digital user experience with the TIBCO[®] Connected Intelligence Cloud platform.

Session Preview:

- Seamlessly Connect Both Cloud and On-premises Applications
- Create Business Value with Low-code Platforms
- Hybrid Integration for the Digital Business User: iPaaS + APIM

Products:

TIBCO Cloud Integration
TIBCO Scribe[®]
TIBCO Cloud Live Apps
TIBCO Cloud[™] Nimbus[®]
TIBCO Cloud Spotfire
TIBCO Cloud Messaging

Maximizing Your Integration Investment

for IT managers, developers, and architects.

Get the most out of the integration tools you have. Learn what's new with TIBCO's integration solutions and get recommendations for migrating TIBCO BusinessWorks[™] 5 workloads to newer releases, and for performance-tuning BusinessWorks 6 and TIBCO BusinessWorks[™] Container Edition environments.

Session Preview:

- TIBCO Integration Overview and Roadmap
- Migrating your BusinessWorks[™] 5 workloads to TIBCO Cloud Integration
- Performance Tuning of your BusinessWorks[™] 6 and TIBCO Cloud Integration Environments

Products:

TIBCO BusinessWorks
TIBCO Mashery
TIBCO Cloud Integration
TIBCO Messaging
TIBCO ActiveMatrix BPM

Breaking Down Data Barriers for Analytics

for business analysts, data engineers, and analytics leaders.

Data virtualization enables a single, virtual, federated data layer. Get an overview of the TIBCO[®] Data Virtualization system and our roadmap for the product. Learn best practices for transforming and wrangling dirty data and for turbo charging analytics with data virtualization.

Session Preview:

- Turbo Charge Analytics with Data Virtualization
- Simplify your Data Experience with Spotfire
- Best Practices to Transform and Wrangle Dirty Data

Products:

TIBCO Data Virtualization
TIBCO MDM
TIBCO Spotfire Data Catalog
TIBCO Spotfire

Creating Beautiful Data Visualizations

for business analysts, analytics leaders, product managers, and developers.

Data visualizations are the window to insight and innovation. Learn what's new in TIBCO Spotfire[®] visual analytics and how to simplify analysis with artificial intelligence. This track also offers a TIBCO Jaspersoft[®] embedded BI overview and roadmap with sessions on building the case for embedded analytics in your user applications.

Session Preview:

- Unboxing the new Spotfire
- Simplify your Data Experience with Spotfire
- The Case for Embedded Analytics: Improve Value of your Applications

Products:

TIBCO Spotfire
TIBCO Jaspersoft

Enabling Data Science Across the Enterprise

for data scientists, data analysts, and business analysts.

Learn the best practices and practical applications of data science and get an overview and roadmap of TIBCO data science products. Sessions include survival skills for data scientists and information on extending and customizing analytics environments for developers.

Session Preview:

- Operationalizing Analytics from Academics to Economics
- Data Science Survival Skills: 5 Tricks to Try when Trapped
- Practical Applications of Data Science

Products:

TIBCO Statistica[™]
TIBCO Spotfire[®] Data Science

Automating Real-time Decisions

for analytics leaders, IT managers, developers, and business analysts.

Creating an end-to-end process with analytics can enable better decisions and smarter real-time actions. Learn about machine learning for business operations, what's new in TIBCO BusinessEvents[®] streaming analytics and get a TIBCO StreamBase[®] environment overview and roadmap.

Session Preview:

- Transform Operations with Real-time Spotfire Dashboards
- Machine Learning in Business Operations
- TIBCO StreamBase[®] Overview and Roadmap

Products:

TIBCO StreamBase[®]
TIBCO BusinessEvents

Leveraging the Latest Trends

for CIOs, IT managers, business analysts, data engineers, analytics leaders.

Disruption courtesy of emerging technologies is nothing new, but today they're coming so thick and fast, and with so much hype, it can be hard to evaluate their potential for your business. This track zeros-in on some trends that we believe may be worth your time, and describes their potential advantages specific to your business and industry.

Session Preview:

- Innovative Trends for Innovative Companies
- Blockchain in the Enterprise: Key Considerations and Patterns
- AI and Machine Learning, Core to Edge: Applications in Industrial IoT

Technology Trends:

APIs
Artificial Intelligence
Blockchain and Smart Contracts
Customer Analytics
Data Intelligence
Edge Processing
Graph Databases
IoT
Machine Learning
Natural Language Processing
Open Source
